Footrests: Featured Products

There are many different footrests available on the market. We carry over 10 different models from several manufacturers.

Things to consider when purchasing a footrest:

- It is height and tilt Adjustable?
- Mobility of the device
- Natural Hip Width of the individual when seated
- Height of the desk / work surface in relation to the client
- Slip / Non-Slip surface
- The setting it will be used in - office / industrial
- Cost

I would like to take this opportunity to introduce you to some of our new products and how they can help you assist your clients.

On behalf of the Functional Ergonomics staff team, we hope that this information is a useful resource for you and that it will enhance your service and product selection.

Sincerely,

Richard

Planning for Ergonomics

Save Money by Purchasing Adjustable Equipment

Ergonomics does not have to be expensive. Through pre-planning, furniture and device purchases can be made for multiple users you will save a lot of money in the long run.

Our staff frequently encounter scenarios where employers purchase bulk orders of desks, chairs, monitors, or keyboard trays intended to meet the needs of the average user. Involving Ergonomists after the design and implementation, costs the employer more money.

People come in different sizes and shapes and this method of refurbishing does not accommodate employees of different heights or body compositions, the people who need the devices the most.

The key to success in this department is Adjustability. By purchasing items that are adjustable, you can modify equipment and workstations to suit a variety of needs.

When refurbishing or renovating your office or industrial space, focus on how adjustable it is or how it will accommodate for a diverse population of individuals. We recommend that you speak with one of our Design Consultants prior to making large purchases, as it will save you money.

Contact our [Design Team](#) to set up a consultation. Our Ergonomists can work with your Interior Decorator or Stylist to ensure the importance of ergonomics does not become an afterthought. Our chairs can be manufactured in custom fabrics and our expansive variety of furniture systems can make colour matching seamless.

About Functional Ergonomics

Functional Ergonomics is a Canadian owned and operated company that provides rehabilitation services and ergonomic devices to employers, insurance companies, government, community agencies, and individuals in our community. The company was initiated in 2006 and has become an industry leader in high quality, cost effective products and services to enable or enhance the function of our clients.

Functional Ergonomics strives to carry environmentally responsible products and make all attempts to carry items that are made and / or assembled in Canada. Our products

Re-Use Department

We have a small selection of used products that may fit your budget. Proceeds from these sales go towards people and organizations in need.

We accept donations of gently used re-useable ergonomic equipment.

The equipment is used for donations or for resale with the proceeds going towards people without funding, not-for-profit organizations, and charitable organizations.

A letter requesting

can be viewed at shop.functionalignergonomics.ca.

We are one of the few Ontario ergonomic device suppliers that have Ergonomists and Kinesiologists on staff who are involved in product selection. We stand behind the products we sell, to be well-made and truly ergonomically designed to better assist you. We offer free consulting services to ensure our clients purchase devices that will address their concerns.

Each individual is unique and not one ergonomic device will suit the needs of all people. Therefore, special consideration should be made to ensure that the device will be a beneficial for you or your client. Our highly knowledgeable sales team will assist you through the process.

equipment, stating the purpose, who it will be going towards, and why funds are not available can be sent to info@functionalignergonomics.ca
